

Official ONLINE Language Support - Outside China

How to read: All the columns must be read independently.

Voice recognition = The translator device can detect and understand this language
 Translation Text = The voice input will be translated to text. If a language is **only** on this list and not on the voice out list, the translation will be shown **only** as a text. **Example:** if you translate from English to Kazakh, you will only see a text translation and not hear a voice translation.
 Voice out = The device will speak back to you in this language. **Example:** Spanish is spoken, the device will speak back to you in Italian. If Italian is also in the Translation Text column you will receive a text translation AND a voice translation.
